

Payal is a practicing family physician and researcher at Women's College Hospital in Toronto. Her work explores how emerging technologies both improve the delivery of healthcare and health science education. As an Innovation Fellow at WIHV, Payal creates and evaluates new models of virtual care, adapting successful approaches from the tech, design and start-up world. She is currently the acting Medical Director of Virtual Clinics at Womens College Hospital, which includes COVIDCare@Home, a remote monitoring program for patients with COVID-19 and Aging in Place, which supports older adults living in their homes. She has previously consultant for several healthcare start-ups on product design and usability. She received degree in Systems Design Engineering from the University of Waterloo in 2007 and graduated from medical school at the University of Toronto in 2011. She is currently perusing a master's degree in health service research.
